Submerchant

After the approval of the marketplace transaction, submerchants are required to have records at iyzico APIs to facilitate the money transfer. Since the merchant already has access to the submerchant details such like, email, address, name, taxoffice, it can be seamlessly transmitted to the iyzico Onboarding API for submerchant account creation and updates.

Submerchant Services

- Submerchant Creation
- Submerchant Update
- Submerchant Details
- Submerchant Price / Item Update

Submerchant Creation

Possible submerchants can be one of the following 3 types:

1. Individual
2. Sole Proprietorship
3. Limited/Incorporated Company.

The parameters sent during the sub-merchant registration process may vary depending on the specific transaction type. Upon the completion of a sub-merchant registration, the response will include a unique **subMerchantKey** assigned to that particular seller. It is **essential** to securely store this value within your system, as you will need to provide the `subMerchantKey` when identifying the seller during the payment process.

> When transmitting parameters to iyzico, it is crucial to ensure that all values are genuine and accurately reflect the required information. Please refrain from sending random, test, or non-authentic data.

Individual Submerchant Request

`POST` `https://api.iyzipay.com/onboarding/submerchant`

Request Body

Name	Type	Description
locale	String	Language (default: tr)
